Your MIPS membership classification determines the extent of your practice that is indemnified by MIPS.

Your membership classification is stated on your most current Member Benefit Statement (tax invoice) or Certificate of Membership (insurance) and provides a summary on page two of your previous practice details. You must ensure your membership classification/s accurately reflects both your previous and current healthcare practice to ensure you do not prejudice your membership benefits including insurance cover.

For further information regarding your category, basis and endorsements refer to Membership Classification Guide in the [Member Handbook](#).
