MIPS commissioned international expert **Dr Mark Graber MD, FACP** to present this special webinar to MIPS members about diagnostic errors in medicine. Diagnosis accounts for the highest number of medical indemnity claims, followed by procedure and treatment, according to the Australian Institute of Health and Welfare. Failure to diagnose, delays and incorrect diagnoses certainly form a large component of the claims and complaints concerning MIPS members. This content would be relevant to all MIPS members and provides a range of very important strategies you can easily implement to your practice.

Presenter

Dr Mark Graber MD, FACP is the Founder and President Society to Improve Diagnosis in Medicine (SIDM). Dr Graber served as the SIDM President from 2011 through 2018, and his contributions constitute the foundations of the field and the focus on diagnostic quality and safety.

Learning objectives

1. Identify the 5 "traps" of diagnosis
2. Discuss the likelihood of diagnosis errors in practice
3. Develop steps to improve diagnostic safety and quality

To obtain a Certificate of Attendance you must view the entire webinar and complete a feedback form. You may pause the video but you cannot track forward or back. Length: 1 hour.
