

Privacy update: assessing performance and evaluating outcomes in clinical practice - Post Webinar Activity

Reading time:

Carly McClen

Date created: 05/03/2026

Time to complete: 5 hours

This CPD activity is divided in two sections. We expect that completing both sections should take you 4 hours.

Section A – (Reviewing Performance - 1 hour) invites you to undertake a Root-Cause-Analysis (RCA) exercise using a hypothetical case scenario.

Section B – (Measuring Outcomes - 4 hours) invites you to evaluate your (or your team's) current practices to ensure quality and safety of patient care in relation to the privacy and confidentiality of health information that is collected for the purposes of delivering care. This will help you to identify actions that you can take to minimise the likelihood of claims, complaints or investigations.

Please complete the template below to submit your responses. We recommend you select a minimum of 5 records to undertake this mini-audit.

PLEASE ENSURE THAT YOU DO NOT DISCLOSE IDENTIFYING PATIENT INFORMATION TO MIPS WHEN COMPLETING THIS MINI-AUDIT.
